

Blind Spot Information System^{*1}

Alerts you to a detected vehicle in your left or right blind spot while driving between 20 mph (32 km/h) and 100 mph (160 km/h)..

When the system detects vehicles approaching from behind in adjacent lanes, the appropriate indicator comes on for a few seconds, providing assistance when you change lanes.

When you move the turn signal lever in the direction of the detected vehicle, the beeper sounds three times.

■ Changing Settings

Change the alert type, or turn the system on or off. Use the True Touchpad to make selections.

1. Press the SETTINGS button.
2. Select Vehicle Settings. The vehicle must be in Park (P).
3. Select Blind Spot Info.
4. Select an alert type, or Off.
5. Press the BACK button to exit the menu.

**1 - If equipped*

■ Important Safety Reminder

Like all assistance systems, the Blind Spot Information System has limitations. Over-reliance on the system may result in a collision. The system is for your convenience only.

WARNING

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death. Do not rely only on the blind spot information system when changing lanes.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.
