

Voice Commands

Using the Voice Control System

The voice control system allows for convenient, hands-free operation of navigation and selected audio and climate control system functions. For a complete list of voice commands, see the Navigation System Manual or press the INFO button, then select VOICE COMMAND HELP. Voice control is also available for the Bluetooth® HandsFreeLink® (HFL) system (see HFL).

The Microphone

The microphone used for voice control system is located in the ceiling console.

It is important to remember that two sets of TALK/BACK buttons are located on the steering wheel. The set shown is only for use with the navigation system and selected audio and climate control functions.

Note: The other set of TALK/BACK buttons is only used for HFL operation (see HFL).

TALK button: Activates the voice control system (audio system mutes). Press and release the TALK button, and wait for a beep.

BACK button: Returns the display to the previous menu screen (until reaching a map screen), and then replays the last prompt.

General Voice Control Guidelines

To control the system properly, do this:

- Make sure that the airflow from the A/C vents does not interfere with the system microphone in the ceiling console. Place your hand over the microphone; if you feel any airflow, adjust the vents.
- Set the fan speed to low (1 or 2).
- Close all the windows and the moonroof.
- If the microphone picks up voices other than yours or if you don't speak clearly, the system may not understand your command. Speak clearly and in a natural speaking voice.

Note: XM premium subscription is needed for "TRAFFIC" or "Weather." Also, there may be a slight lag time in receiving information.

Tip: To plot a route to a specific destination using voice control, say "**Display menu**," then enter the address. See the following page for an example of this process.

Voice Commands

Entering a Destination Using Voice Control

Note: Press and release the NAVI TALK button, wait for a beep, and say your command.

1. Say "display menu." The display changes to the Enter Destination by screen.

2. Say "address."

3. Say "city" (or "change state" if necessary).

4. Say the name of the city or say "select current city."

5. A list of city names appears. Say the number listed next to the desired city.

6. Say the street name. Do not say the direction (north, south, east, or west) or type (street, avenue, etc).

7. Say the number listed next to the name of the desired street.

8. Say the street address number as a continuous series. For example, for the address number 15200, say "one, five, two, zero, zero, done."
9. The system calculates the selected route. Say "OK" to display a map of the route. The plotted route appears in blue.

Tip: While en route, you can cancel or change your current destination or select other options by saying "display menu."
