

# SONG BY VOICE™ (SBV)

Play songs from your iPod and HDD from most navigation/audio screens by using simple voice commands.

## Playing Audio Files Using Voice Commands

Press and release the Talk button before you say a command.

### Using the "Play" Command

Say "iPod search" or "HDD search."

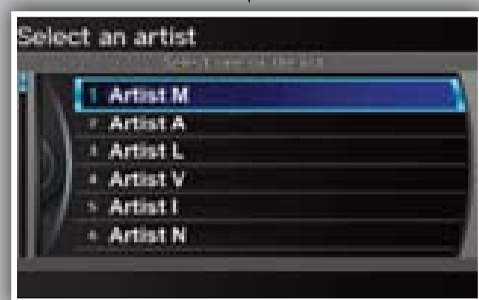

Say "Play" and one of the options on the Search Mode screen. For example, say "Play Artist XYZ."

if exact match found

if exact match not found

The system provides voice feedback and lists possible matches.

Say the number of the corresponding selection you wish to play. For example, say "Four."

The system plays the selection and returns to the Search Mode screen.

## Playing Audio Files Using Voice Commands (continued)

Press and release the Talk button before you say a command.

### Using the "List" Command

Say "iPod search" or "HDD search."

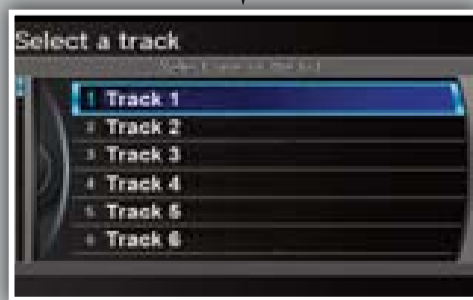

Say "List" and one of the options on the Search Mode screen. For example, say "List Artist XYZ."

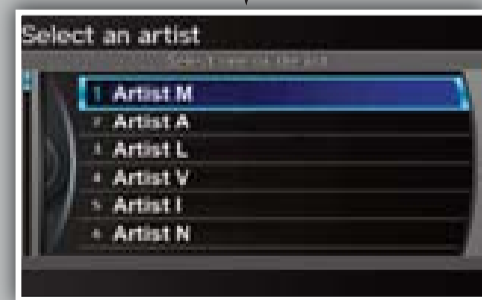

if exact match found

if exact match not found

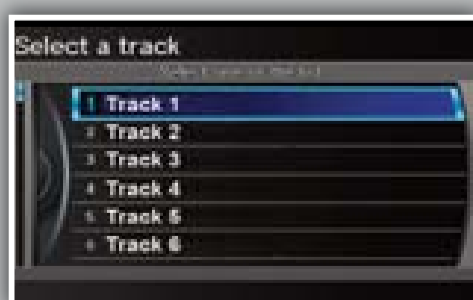

A list of tracks from the selected artist displays.

The system provides voice feedback and lists possible matches.

Say the number of your selection. For example, say "One."

Say the number of the artist. For example, say "Four."

The system plays the selection and returns to the Search Mode screen.
