Reactive Force Pedal

Assists during driving by responding to the force of your foot on the accelerator pedal.

When you press the accelerator pedal, the system can provide slight resistance to prevent you from applying excessive throttle to the accelerator. Usually, the feedback is unnoticeable while driving.

As a result, this can yield better fuel efficiency and provide traction control while driving on slippery roads.

The system also can provide slight resistance through the accelerator during operation of the Collision Mitigation Braking System.

Reactive force pedal is off in Sport mode.

Changing Settings

Adjust the pedal force level. Use the interface dial to make and enter selections.

1. Press SETTINGS.
2. Select Vehicle Settings.
4. Select one of the options.
   - **High Force**: More pedal feedback.
   - **Low Force**: Less pedal feedback and natural acceleration feeling.
5. Press BACK to exit the menu.

Shifting

Change your vehicle’s gears to begin driving.

Electronic Gear Selector

Select the vehicle’s gear using a simple button interface.

- **Park (P)**: Used for parking or starting or turning off the vehicle. Press P with the brake pedal pressed. A red indicator appears.
- **Reverse (R)**: Used for reversing. Pull back R. A green indicator appears.
- **Neutral (N)**: Used for idling. Press N. A red indicator appears.
- **Drive (D)**: Used for normal driving or sequential mode. Press D. A green indicator appears. Release the electric parking brake to begin driving.
When you change from D to R and vice versa, come to a complete stop and keep the brake pedal pressed. Operating the shift button before the vehicle has come to a complete standstill can damage the transmission.

Auto park mode
For your convenience, Park (P) is automatically selected when all of the following conditions are met:
• The vehicle is stopped.
• The driver’s seatbelt is unbuckled.
• The driver’s door is opened.

Car wash mode
If you are driving through a conveyor-style car wash where you or the attendant do not remain in the vehicle, follow these steps while the engine is on:
1. Press and hold the brake pedal.
2. Select N.
3. Press the N button again and hold it for two seconds.
The vehicle will enter car wash mode. If the ENGINE STOP/START button is pressed after car wash mode has been activated, the power mode will change to ACCESSORY for 15 minutes, the gear position will remain in N and the power mode will remain in ACCESSORY. After 15 minutes, the position automatically changes to (P) and the power mode changes to OFF.

⚠️WARNING
The vehicle can roll away if left unattended without confirming that Park is engaged. Always keep your foot on the brake pedal until you have confirmed that (P) is shown on the gear position indicator.
