

## Integrated Dynamics System

Choose a driving mode for your preference based on road conditions, vehicle speed, and handling.

**Econ:** Maximizes fuel efficiency.

**Normal:** Balances fuel efficiency and sportiness for everyday driving.

**Sport:** Enhances vehicle response and feel through decreased steering assist and increased throttle response.

**Sport+:** Adds to Sport mode and allows increased performance when using paddle shifters.

## Vehicle Stability Assist (VSA®)

Also known as Electronic Stability Control (ESC), VSA helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It assists in maintaining traction on slippery surfaces by regulating engine output and selectively applying the brakes.

### ■ Turning VSA On or Off

VSA is turned on every time you turn on the vehicle. If you turn VSA off, your vehicle has normal braking and cornering ability, but VSA traction and stability enhancement become less effective.

Press and hold the VSA OFF button until you hear a beep to turn VSA on or off. The VSA OFF indicator appears when the system is off.

Traction control stops functioning, which allows the wheels to spin more freely at low speed. This can be helpful when trying to free your vehicle if it is stuck in mud or snow.
