

## ■ Wireless Charger\*

Charge your Qi®-compatible device when the vehicle is on.

1. Open the center pocket. Place the device to be charged on the charging area. A green indicator appears when the charger is on.
2. The green indicator turns off when charging is complete. On some devices, the the green indicator may blink when charging is complete.

### Notes:

- This system consumes a lot of power. It is best to charge your device when the engine is running.
- If the indicator light is blinking, there may be an obstacle between the device and charging area, the device may have moved, or the charger is malfunctioning.
- The device may not charge if you are near strong electromagnetic waves, such as at a gas station.
- The device and charging area may get warm during charging. This is normal.

### ⚠ CAUTION

- Metal objects between the charger and the device to be charged will get hot and can burn you.
- Remove foreign objects from the charger before charging the device.

### NOTICE

- Do not attach a metal object to the charger.
- Do not charge when the charger is covered with a towel, layer of dust, etc.
- Do not allow the charger to get wet from water, beverages, etc.
- Do not wipe the charger with oils, alcohol, benzine, thinners, etc. or expose it to aerosols.
- Do not use the charger if it is malfunctioning. In the unlikely event the charger emits smoke, abnormal odors or unusual sounds, stop use immediately.
- Do not place any magnetic devices, credit cards or watches within the charge area while charging. The data on credit cards can be lost and watches may stop working.
