

System Updates

The audio system's firmware can be updated with the telematics control unit (TCU) on the subscription-based service.

■ Wireless Connection Setup

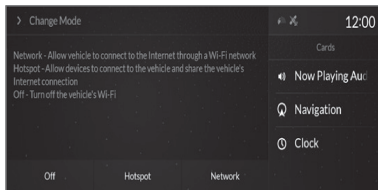

1. Press the Home button.
2. Swipe right to display the App Lists screen.
3. Select System Updates.
4. Select MENU.

5. Select Connection Setup.
6. Select Wi-Fi.
7. Select Change Mode.
8. Select Network, then Confirm.

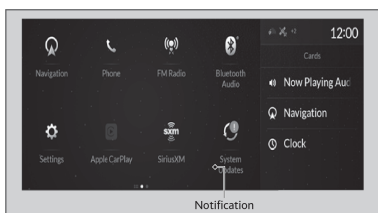

The display returns to the network list.

9. Select an access point from the network list, then OK.
If the audio system requires a password, enter a password.

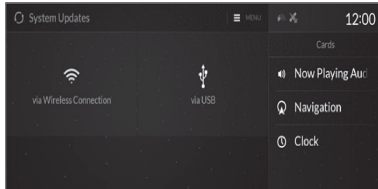

■ Wireless Updating

1. Press the Home button.
2. Select System Updates.
3. Select via Wireless Connection.
When the download is complete, the screen for step 6 will be displayed.

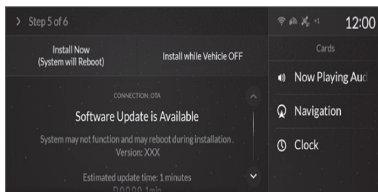

4. Select Download Now.
A notification will appear on the screen.
5. Select Install Now or Install while Vehicle OFF.

A notification appears on the screen if the update is successful when Install Now is selected.

If you select Install while Vehicle OFF, proceed to steps 7 and 8.

6. Set the power mode to VEHICLE OFF (LOCK).

A notification will appear on the screen. If you select Postpone Update, the update will be postponed.

7. Exit from your vehicle.

The system will start the firmware update.

If the update is successful, a notification informing you of this fact will appear on the screen the next time you set the power mode to ON.

■ USB Updating

Download the update files from the server

1. Press the Home button.
2. Swipe right the touchpad A to display the App Lists screen.
3. Select System Updates.
4. Select Via USB.

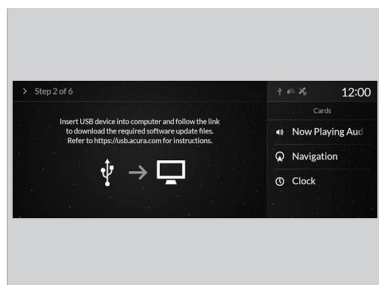

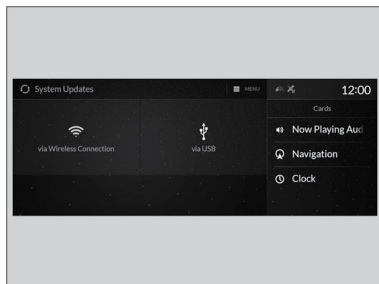

A notification appears on the screen.

5. Connect a USB device into the USB port in the console compartment. The inventory data is copied into the USB device.

6. Remove the USB device from the USB port.

7. Connect the USB device into your computer, and then download the update files.

Follow the link to download the required software update files. Refer to usb.acura.com for instructions.

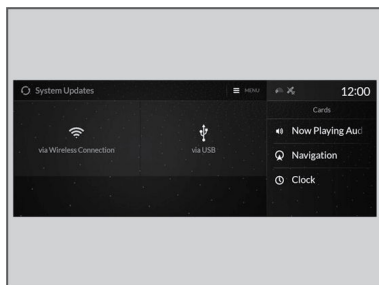

Update the Audio System

1. Press the Home button.
2. Select System Updates.
3. Select via USB.

A notification appears on the screen.

4. Connect the USB device with the update files into the USB port.

A notification appears on the screen.

5. Select Install Now or Install while Vehicle OFF.

A notification appears on the screen if the update is successful when Install Now is selected.

When you select Install while Vehicle OFF go to step 7.

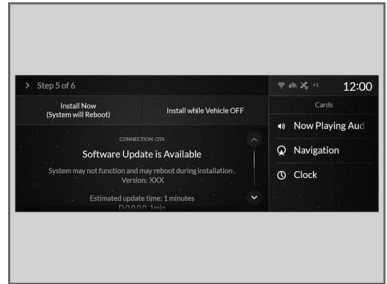

6. Turn the vehicle off.

A notification appears on the screen. If you select Postpone Update, the update is postponed.

7. Exit from your vehicle.

The system will start the firmware update.

A notification appears on the screen if the update is successful at the next time you set the power mode to ON.

Uploading Installation Report

At the completion of the software update, your vehicle will import information onto the USB drive.

1. With the USB drive inserted back into your computer, select the "Browse" button.
2. Locate the folder named "rb" on the USB drive.
3. Select the file name "report_by_usb.json" located in the "rb" folder.

Example file format:

```
"XXXXXXXXXXXXXXXXXXXX_report_by_usb.json"
```

4. Click the "Open" button, located in the lower right corner of the pop-up window.
5. Verify the "report_by_usb.json" file is displayed in the box next to the "Browse" button.
6. Select the "Upload" button.
7. Once the Installation Report is uploaded the software update is complete.
