

Adaptive Cruise Control with Low Speed Follow (ACC with Low Speed Follow)

Helps maintain a constant vehicle speed and a set following interval behind a vehicle detected ahead of yours and, if the detected vehicle comes to a stop, can decelerate and stop your vehicle, without you having to keep your foot on the brake or the accelerator. When ACC with Low Speed Follow slows your vehicle by applying the brakes, your vehicle's brake lights will illuminate.

⚠ WARNING

Exiting a vehicle that has been stopped while the ACC with LSF system is operating can result in the vehicle moving without operator control.

A vehicle that moves without operator control can cause a crash, resulting in serious injury or death.

Never exit a vehicle when the vehicle is stopped by ACC with LSF.

■ Activating and Setting the Vehicle Speed

1. Press the MAIN button. The ACC indicator appears.
2. Accelerate to the desired speed.
 Above 25 *mph* (40 *km/h*): Take your foot off the pedal and press RES/+ / SET/- to set the speed.
 Below 25 *mph* (40 *km/h*) (*Low Speed Follow*): Press SET/- to set the speed at 25 *mph* (40 *km/h*).

■ Adjusting the Vehicle Speed

Press the RES/+ switch to increase speed, or the SET/- switch to decrease speed.

Each time you press the switch up or down, the vehicle speed is increased or decreased by about 1 *mph* (1 *km/h*). If you keep the switch pressed up or down, the vehicle speed increases or decreases by 5 *mph* or 5 *km/h* until you release it.

■ Adjusting the Vehicle Distance

Press the Interval button to change the following interval. Each time you press the button, the setting cycles through extra long, long, middle, and short.

■ During Operation

If a vehicle is detected ahead of you when ACC with Low Speed Follow is turned on, the system maintains, accelerates, or decelerates your vehicle's set speed to keep the vehicle's set following interval from the vehicle ahead.

If a vehicle detected ahead of you slows down abruptly or if another vehicle cuts in front of you, a beep sounds and BRAKE appears on the multi-information display to alert you.

⚠ WARNING

ACC with Low Speed Follow has limited braking capability and may not stop your vehicle in time to avoid a collision with a vehicle that quickly stops in front of you.

Always be prepared to apply the brake pedal when conditions require.

■ Canceling ACC with Low Speed Follow

You can press the CANCEL button, MAIN button, or the brake pedal. The ACC with Low Speed Follow indicator goes off.

Certain conditions may cause ACC to cancel automatically. When this happens, a beep sounds and a message appears on the multi-information display.

After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ switch.

Press the MAIN button to turn the system off.

⚠ WARNING

Improper use of ACC with Low Speed Follow can lead to a crash.

Use ACC with Low Speed Follow only when driving on expressways or freeways and in good weather conditions.

■ Switching to Standard Cruise Control

Press and hold the Interval button for one second.

Cruise Mode Selected appears in the multi-information display for two seconds, and then the mode switches to Cruise.

Press and hold the interval button for one second to switch back to ACC with Low Speed Follow. **ACC Mode Selected** appears on the multi-information display for two seconds.
