# Locking/Unlocking the Doors from the Outside
■ Using the Keyless Access System

When you carry the keyless access remote, the outer door handles automatically pop in/out and you can lock/unlock the doors and open the hatch.
Outer door handles automatically pop in/out within about 6 feet (2 m) radius of the outside door handle.
You can lock/unlock the doors within a radius of about 32 inches (80 cm) of the outside door handle. You can open the hatch within about 32 inches (80 cm) radius from the hatch release button.

■ Locking the vehicle

Press the door lock button on either door.
▶ Some exterior lights flash; the beeper sounds; both doors lock; both outer door handles pop in if they are popped out; and the security system sets.

▶ Using the Keyless Access System

If you do not open a door within 30 seconds of unlocking the vehicle, the doors will automatically relock and the outer handles of the doors will automatically pop back in.

You can lock or unlock doors using the remote transmitter or keyless access system only when the power mode is in VEHICLE OFF.

- Do not leave the keyless access remote in the vehicle when you get out. Carry it with you.
- Even if you are not carrying the keyless access remote, you can lock/unlock the doors while someone else with the remote is within range.
- The door may be unlocked if the door handle is covered with water in heavy rain or in a car wash if the keyless access remote is within range.
- If you grip either door handle wearing gloves, the door sensor may be slow to respond or may not respond by unlocking the doors.
- The door may not open if you pull it immediately after gripping the door handle. Grip the handle again and confirm that the door is unlocked before pulling the handle.
- Even within the 32 inches (80 cm) radius, you may not be able to lock/unlock the doors with the keyless access remote if it is above or below the outside handle.
- The keyless access remote may not operate if it is too close to the door and door glass.
